Ocrolus

Mortgage Originations, Powered by Ocrolus

Ocrolus automates the capture and analysis of mortgage documents, replacing inefficient manual data entry and review with a single, seamless API.

Ocrolus identifies borrower-supplied mortgage documents, captures critical data, and returns results directly into your LOS or CRM platform. Mortgage originators make smarter, faster loan approvals by using Ocrolus to initiate an accelerated and secure underwriting process. The solution offers immediate and measurable ROI with minimal document training or integration set-up.

Mortgage Documents Analyzed

Ocrolus transforms any mortgage document image, including e-statements, scans, and cell phone pictures, into 99+% accurate digitized data, establishing a comprehensive audit trail of clean data.

Human Empowered Automation

Ocrolus intertwines AI, machine learning, and human intuition to quickly produce unrivaled accuracy:

1. The platform classifies uploaded images using machine learning and human quality control.

2. AI-based computer vision extracts data from images classified as mortgage documents.

3. Data fields that can't be confirmed automatically are validated by human technicians in a hyper-efficient process.

Verify Borrower Income in Minutes

Ocrolus goes beyond digitizing data, generating over 35 pre-defined analytics to help lenders determine a borrower's creditworthiness. The platform calculates a mortgage borrower's income and cash flow with customizable credit inputs that your LOS can call up, along with pre-programmed analytics, such as:

- ✓ Estimated income transactions
- ✓ Average daily balance
- ✓ NSF incidents

Multilayered ID Validation

Ocrolus collates a mortgage borrower's identity and proof of residence from licenses, passports, utility bills, state ID cards, and other identifying documents.

Intelligent Fraud Detection

Ocrolus identifies potentially fraudulent mortgage documents by harnessing an intelligence network featuring hundreds of financial services leaders, along with attended fraud detection that uncovers:

Photoshopped Images	**Missing Pages**
Invalid Dates	**Abnormal Fonts**
Invalid Amounts	**Incomplete Data Sets**

Get Started Today

Test Ocrolus now. Whether you're manually processing borrower documents or deploying a legacy capture solution, **visit Ocrolus.com** to try the platform on your real world documents today.
